

1

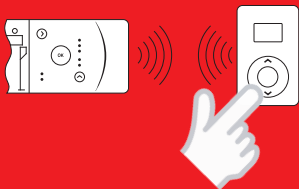

When all actuators are connected, connect CF-MC Master Controller to mains supply.

2

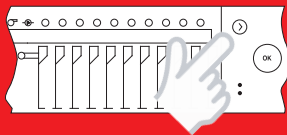

1. Press \wedge button and the Install LED flashes.
2. Press OK button and the Install LED lights.

3

Press center button of CF-R room thermostat once.

4

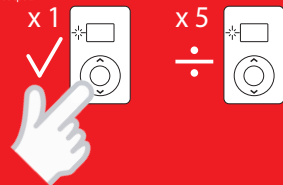

First available output is flashing. Push $\>$ until you reach the wanted output.

5

Press OK button to add the room thermostat to CF-MC.
Repeat the steps for each room thermostat you wish to add.

6

Place the room thermostat in the room and press center button for link test. LED flashes once: Link is established. LED flashes 5 times: Link has failed.
